FARM BARGAIN.

For a period of 30 days I will offer for sale at a bargain price and on liberal terms, one of the best farms in Thurston county, Nebraska, located one and three-quarters miles north of Winnebago, and four miles south of Homer. This farm comprises 140 acres of practically level, highly productive land, improved with good 7-room house, barn, cribs, hoghouse, and other necessary outbuildings, and about two miles of woven wire fence. About 100 acres of this farm is now in tame grass. The farm is located on a perfect road to a good market, churches and excellent schools, both protestant and Catholic. For price and terms address, SIDNEY T. FRUM, Dakota City, Neb.

Nebraska Man Treated For Cancer.

Ten Years Ago George Holton Was Treated Successfully for Cancer

By Dr. O. A. Johnson.

Mr. George A. Holton of Hardy, Neb., was afflicted with a lip cancer that seemed incurable until he went to Dr. O. A. Johnson, cancer specialist of Kansas City, Mo. Mr. Holton writes of his treatment:

"I began treatment May 10, and in about eight weeks seemed to be cured. I came home and have had no more trouble. I visited Dr. Johnson at intervals for a few months to make sure I was entirely cured. I take constitutional treatment occasionally, which the doctor advises in most cases, and when I am in Kansas City call on him.

"When I began taking treatment my case was of about six months' standing and seemed to be developing very fast. My lip was swollen a good deal.

"I have advised a number of cases to go to Dr. Johnson for treatment. I would advise anyone afflicted with this dread disease, do not delay, as delays in these cases are often dangerous. It is much easier on the patient and also on the doctor and nurses, if treated in the early stages. I also advise taking the doctor's advice while under his care. You will get along much better and be happier that you took his advice."

Dr. Johnson has become widely known as a specialist in treatment of cancer. He conducts a large Research Laboratory, devoted entirely to this cruel disease. The treatment is entirely medicinal—external applications are used to destroy the cancer and internal medication to purify the blood. Any sufferer should write at once to Dr. Johnson for his book, "Cancer Truths," which tells of his experiences and wonderful non-surgical treatment. Address, Dr. O. A. Johnson, Suite 530, 1324 Main St., Kansas City, Mo.

Many Farmers Building Machine Sheds

Many Nebraska farmers are building machine sheds this fall. The high cost of implements makes a shed well worth while. The College of Agriculture Extension Service has sent out hundreds of farm building plans and has just completed plans for a machine shed suitable for large farms. This shed is of frame construction, 24x72 feet, with doors on the south side. These plans are now ready for distribution, complete with bill of material, and anyone desiring them should mention No. 10, 74-11.

Egg Production Means Proper Feeding.

Hens are expected to manufacture eggs without the necessary raw material in many farms, according to the observation of University extension workers. It is often thought that chickens running on range will pick up the proper feed. The result is decreased egg production. It is advocated that a mixture of slack lime and sand be kept in the poultry yard. A dry mash hopper containing the raw material for egg manufacture is indispensable. Eighty per cent of an egg is water. Yet many persons expect chickens to get along without any water. An abundance of pure water alone will often work wonders in increasing egg production.

No disaster too big for Red Cross.

RED CROSS NEED OF MONEY TOLD

Work Must Be Carried on Across the Waters and in the United States.

PEACE PROGRAM PLANNED

Enrollment is a Vote of Confidence in the Future and an Appreciation of Tasks Accomplished.

The American Red Cross is preparing to launch its third Roll Call, to be held from Nov. 2 to 11, for 20,000,000 annual members and \$15,000,000.

The first question that will arise is:

"Why does the Red Cross need money? The war is over."

National headquarters of the American Red Cross has answered this question, and has outlined graphically the reasons why it is necessary to raise \$15,000,000 for its international, national and local work.

In brief the answer is as follows:

Because: The actual war work is not completed. The Red Cross cannot lay down its responsibilities to the American soldiers, sailors or marines until everyone of them has been released from service, recovered from illness or wounds or receiving proper care, or back in the place in the world from which the war snatched them.

Because: The American Red Cross is planning to launch a comprehensive program for peace times, designed to prevent the needless waste of human lives through preventable diseases and accidents in America; continue and broaden its home service work and public nursing, first aid, home hygiene and Junior Red Cross activities.

Because: By a recent act of Congress medical, surgical and dietary food supplies valued at \$35,000,000 were turned over to the Red Cross by the government, the supplies having been purchased for use with the American forces. These supplies are scattered throughout Europe, many of them far from the places where they are most needed. The prompt and efficient distribution and handling of these supplies means the maintenance of a force of trained workers where the supplies are and where they are most needed.

Because: Pestilence and starvation have gripped many European countries because of the war. These countries are unable to cope with their own difficulties, and the only force organized with facilities capable of stepping into the breach and bringing order from chaos is the Red Cross. Typhus is sapping the man strength of many countries, and the American Red Cross is using every available power to check it.

Because: The Red Cross must be prepared to meet emergencies arising from disasters at home and abroad.

The Red Cross membership must be maintained at its present high standard. Every enrollment is a vote of confidence in the past performances of the American Red Cross and a reaffirmation of the belief in the principles for which it has stood in the past and its plans for the future.

The Red Cross, having committed itself to a definite and comprehensive program, cannot turn back, and to go forward it must have as general a membership as possible and ample funds to provide for any contingency.

LOCATES MOTHER AFTER FOUR DAYS IN DESERT SANDS

Four days by camel from Damascus, in a little desert village nestled in the blazing sands, lived the Syrian mother of an American soldier, waiting, yearning for word from her son who had gone to far-off America.

George Hamway, the son, enlisted with the American colors when this country went to war, and fell fighting in the Argonne, leaving to the mother a \$5,000 government insurance policy. The address of the mother was vague. She lived in the heart of the desert, four days from Damascus—that was the only address George knew.

The task of finding the mother was given to the Red Cross mission in Palestine, and the search was started immediately. Strange by-ways of that land of mystery—the great desert—were visited by Red Cross workers, and at length the mother was found.

She was taken to Damascus by camel, accompanied by witnesses establishing her identity, and after much palaver it was explained that the American government would make remittances to her which meant comparative affluence for her declining days.

CLUBS TO AID RED CROSS.

A series of club days are being arranged by the Red Cross as a forerunner of the Third Roll Call to be conducted from November 2 to 11. Business, commercial, rotary, Kiwanis, advertising, fraternal, women's and other clubs are being invited to set aside one meeting day to be devoted to the Red Cross.
